

## **REMARKS/ARGUMENTS**

Reconsideration and withdrawal of the rejections of the application are respectfully requested in view of the amendments and remarks herewith, which place the application into condition for allowance. The present amendment is being made to facilitate prosecution of the application.

### **I. STATUS OF THE CLAIMS**

Claims 5-6, 10, and 18-20 are currently pending. Claims 1-4, 7-9, and 11 are canceled without prejudice or disclaimer of subject matter. Claims 12-17 have been withdrawn without prejudice or disclaimer of subject matter. Claims 18-20 are newly added.

No new matter has been introduced. Changes to the claims are not made for the purpose of patentability within the meaning of 35 U.S.C. §101, §102, §103, or §112. Rather, these changes are made simply for clarification and to round out the scope of protection to which Applicant is entitled.

### **II. ALLOWABLE SUBJECT MATTER**

Claim 5 incorporates features of claims 1, 2, and 4 and, therefore, is allowable, as indicated in the Office Action (page 6).

Claim 18 recites "wherein said impurity region is arranged in more than three layers along the depth direction of said substrate and said second impurity region is arranged in more than three layers along the depth direction of said substrate" and recites similar, or somewhat similar, features of claim 5 and, therefore, is also allowable.

### III. DEPENDENT CLAIMS

The other claims are each dependent from one of the independent claims discussed above, and are therefore believed patentable for at least the same reasons. Since each dependent claim is also deemed to define an additional aspect of the invention, however, the individual reconsideration of the patentability of each on its own merits is respectfully requested.

Similarly, because Applicants maintain that all claims are allowable for at least the reasons presented hereinabove, in the interests of brevity, this response does not comment on each and every comment made by the Examiner in the Office Action. This should not be taken as acquiescence of the substance of those comments, and Applicants reserve the right to address such comments.

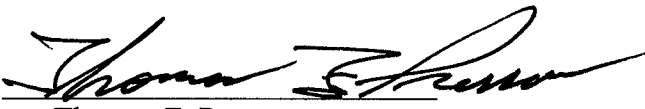

### CONCLUSION

In view of the foregoing remarks, it is believed that all of the claims in this application are patentable and Applicants respectfully request early passage to issue of the present application.
